Hands-on Labs

Camunda 8 Self-Managed with Kubernetes / GCP Hands-On Learning

Have you ever wanted to see how Camunda 8's resilient orchestration engine runs on Kubernetes under the hood?

[Helm Charts](#)[Access Plans](#)[Get Started](#)[Udemy Practice Test: c8-k8s](#)

Camunda 8.9.7 Helm Version 14.4.1

Released on 11 Jun, 2026

Explore **26 snapshots** from the hands-on labs and see what you'll build, learn, and accomplish. Screenshots speak louder than descriptions !

Validate your Camunda 8.9 Self-Managed knowledge after completing the hands-on labs.

- ✓ **70 Questions** on Architecture & Operations
- ✓ Real-world troubleshooting scenarios
- ✓ Detailed explanations for every answer

Sign-In to start your c8-labs now !

The diagram illustrates the 8.8+ Architecture, showing the interaction between various components:

- User** (Green circle) connects to **Connectors** (Green box).
- Connectors** (Green box) contains **Connector** and **Connector** components.
- Clients** (Green box) contains **Client** and **Client** components.
- Identity Provider** (White box) contains **Identity** and **Identity** components.
- Management API** (White box) contains **Management** and **Management** components.
- Primary Storage** (White box) contains **Primary** and **Primary** components.
- Search engine** (White box) contains **Search** and **Search** components.
- Partition** (White box) contains **Partition** and **Partition** components.
- PostgreSQL** (White box) contains **PostgreSQL** and **PostgreSQL** components.
- MongoDB** (White box) contains **MongoDB** and **MongoDB** components.
- Secondary Storage** (White box) contains **Secondary** and **Secondary** components.
- Camunda - Management Cluster (TSG)** (White box) contains **Camunda** and **Camunda** components.
- Camunda - Orchestration Cluster** (White box) contains **Camunda** and **Camunda** components.

The diagram shows the flow of data and interactions between these components, including connections to **PostgreSQL**, **MongoDB**, and **Secondary Storage**.

What You'll Learn / Do

By the end of the labs, you'll be able to:

- Deploy Camunda 8 on Kubernetes/GCP
- Inside view of Kubernetes objects and Topology
- Deploy and operate Zeebe Orchestration, Operate, Tasklist, Identity, Optimize, and Connectors
- Monitor workloads using Prometheus and Grafana
- Troubleshoot deployment issues
- Scale and manage Camunda components

There are a **few advanced lab exercises** included in this program.

- Increase the partition count of the Zeebe cluster

- Generate a burst of transaction volume while the exporter is paused

[Return to top](#)

Who Should Attend?

This lab is ideal for:

- Camunda Developers
- Solution Architects
- DevOps Engineers
- Migrating from Camunda 7 to Camunda 8
- Camunda 8 Upskill

Get Started

Choose the option that matches how you'd like to access the labs. Refer to **Access Plans** section above to know the scope of what is covered under each plan.

- **Free Tier – During Community Events**

Start your 6-hour hands-on lab. Free Tier is applicable during select time intervals - such as Community Events. No waiting, no manual approval. Use the **Sign In** button and verify your email with a one-time password (OTP).

- **Premium Tier – Start Any Day / Any Time**

Online purchase available. Web portal navigates the user with instructions for payment. After making the payment, in a matter of seconds, you get instant access to the learning platform. No manual intervention required! Use the **Sign In** button and Google as Identity Provider.

Usage Policy and Educational Use Notice

c8-labs is an independent learning platform created to provide hands-on experience with modern cloud-native technologies and workflow orchestration. The learning content may include references to third-party technologies, product names, logos, trademarks, documentation, user

All trademarks, logos, and other intellectual property remain the property of their respective owners. Their inclusion does not imply endorsement, sponsorship, or affiliation with **c8-labs** or **MakeLabs.in** unless expressly stated. Participants are expected to use the platform responsibly and only for the intended learning activities. Any temporary cloud resources, credentials, or access provided as part of a lab must not be used for purposes outside the scope of the workshop or training.

Acknowledgements

The c8-labs learning platform has been made possible by the technologies, open-source projects, and cloud services provided by the following organizations and communities.

We gratefully acknowledge:

- Camunda – Workflow orchestration platform and BPMN/DMN ecosystem.
- Google Cloud Platform (GCP) – Cloud infrastructure and managed Kubernetes environment.
- Kubernetes – Container orchestration platform.
- Helm – Kubernetes package manager.
- Cloudflare – DNS, SSL, and edge networking services.
- Grafana – Metrics visualization and observability dashboards.
- Prometheus – Metrics collection and monitoring.
- Keycloak – Identity and Access Management (IAM).
- PostgreSQL – Relational database.
- Elasticsearch – Search and analytics engine.
- Headlamp – Kubernetes web user interface.
